

7 IN 1 FILTER CARTRIDGE (VN)

REPLACEMENT CARTRIDGES /
ACCESSORIES

PRODUCT-NO.: 205264

7-in-1 filter cartridge for use with Fountain and Fountain 7S (Copper Gold, Silver Grey and Anthracite) drinking water filters.

7 stages of filter media are combined in one single filter cartridge. This ensures exceptionally clean and safe filtration performance. An ultrafiltration hollow fibre membrane with a pore size down to 0.01 microns provides bacteria-free drinking water instantly, with no electricity required. Silverlite stone increases the safety of the whole filter system. It contains silver ions and several minerals to prevent the growth of bacteria inside the filter system and contamination from outside the filter.

The main features

7 stages in 1 cartridge for easier filter replacement

Certified drinking water safety to NSF Standard 42 & 53

An ultrafiltration hollow fibre membrane with a pore size down to 0.01 microns provides bacteria-free drinking water instantly, with no electricity required

Large carbon layers for great tasting filtered water

Easy filter replacement, no tools needed

Installation information

Please ask your local power supply utility or a registered electrician to install appliances that are not fully wired, i.e. ready to plug in.

The electrician should also be able to assist you with obtaining the agreement of the respective power supply utility required for the appliance installation.
